

COFFEE & TEA

PROVEN SOLUTIONS

We have proven solutions for optimal machinability and product performance. Our barrier technology offers improved shelf life for your oxygen sensitive products. We use high performance sealants for hermeticity and seal-through capability and customized blends for easy-open seals and consumer convenience.

Several easy-open solutions are available to complement your product, including our proprietary SimpleTear® technology. SimpleTear® allows the consumer to tear anywhere along the side of a stickpack – no tear notch required. It's a cost-effective way to provide a consistent easy-open without impacting the barrier.

AVAILABLE PACKAGING TYPES
